

Adding Value Where It Counts.

Cash-In EZ-Wedge

Linking Machine Counts To Your Financial Software.

PRODUCTIVITY & ACCURACY

Use the PRINT function on your Bill Discriminator or Value Counter to instantly send counts from the machine into the Cash-In fields of your teller application!

IT STAFF FRIENDLY

No software to install on the PC and no alteration to the teller app is needed.

The PC sees the CASH-IN EZ-Wedge as a second USB keyboard.

FLEXIBLE

Easily configured on-site for any financial application. The installer uses a simple setup utility to configure the EZ-Wedge for any banking or retail program. The EZ-Wedge is a small device 2" square. The bill counter plugs into the wedge and the wedge connects to any spare USB port on the teller workstation.

RELIABLE

Add-On Technologies, Inc. has been providing robust interface solutions for the financial industry since 1994. Our "no complexity" approach to installation and easy usage means your machinery is brought online in record time and with a minimum of teller training.

Press Print On Your Counter To Instantly Send The Counts Into Your PC Screen.

MAXIMIZE YOUR TELLER LINE PRODUCTIVITY!

Get maximum return from your cash handling equipment! The count data belongs in the teller application, not just on the display of a machine.

Let your tellers use their time building customer relationships and cross selling rather than tending to the mundane task of manual key entry.

The CASH-IN EZ-Wedge allows you to create a working interface in less than 15 minutes!

Cash Counting Equipment has become a standard fixture on teller lines, and in Retail counting rooms. Though these machines save a lot of time, the automation is only half complete. The tellers still have to write down the counts and then manually enter them from the machine into their teller program. This is both time consuming and prone to errors.

The Add-On Technologies wedge interface products overcome these limitations by automatically populating the cash received entry fields in the teller app.
